MICROSPHERES - NEW AND IMPROVED

Our new and improved Microspheres are equivalent to the current product but with an added level of quality control and a more convenient bottle size.

We strive for continuous improvement

With this product, we have implemented a more stringent control with intensity of fluorescence, thereby ensuring an even tighter lot-to-lot variability.

Easier to stay fresh

A fresh bead ensures a great result - every time. Our Microspheres are now available in a 1 mL drop bottle so you can keep your inventory fresh without having to discard expired product.

Order today!

Microspheres 0.5 µm, 1 mL:
P/N 13635
